PRODUCT

✓ Easy to use

Keep it simple by ensuring high usability with simple but effective interface for user to navigate. User spends very little time feeding your data.

🔄 End to End Business

Plug-in modules like Inventory, Billing, Customer support and HR/Payroll to your CRM and enjoy the benefits of a mini-ERP.

🔗 Flexible

Add custom fields to forms and reports to suit your customized needs. Create custom reports dynamically. Have your own flavor without complexity. End Business solution.

📈 Scalable

Build long lasting relations with your customers. Increase sales team productivity. Chase less and close more deals. Reduce the risk of irritating your customers.

🌱 Pay as you grow

Pay for the minimum number of users you have and add users as your business grows with us. Have an affordable solution.

Multiple Inventory Ownership

The ability to track multiple inventories, employee multiple business rules, and manage billing for multiple customers improves 3PL and distributor efficiency.

Technology at work for your Warehouse

Warehouse Management System (WMS) is vital to improving the efficiency of a company's warehouse operations. It can be customized to fit the needs of companies of any size. System is fully scalable and expandable to include other modules. System uses barcoding which help extend enterprise to the mobile worker, while increasing operational efficiencies and enhancing your customer service.

🚚 Receiving -

Accelerate receiving processes by clearly identifying inventory and improving tracking capabilities with or without inbound orders.

🏠 Storage

Automatically put away material in the best location according to your facility.

🛒 Cross-docking

Benefit from the ability to either pick items or move them directly from the inbound dock to the outbound dock, thereby avoiding storage and replenishment and reducing staffing and equipment needs, space requirements, and inventory carrying costs.

📊 Wave Planning

Gain operational efficiency and control by grouping orders into waves to be planned and released together.

👤 Picking

Following wave planning, make released picks available to operators who can then pick orders quickly, without errors, using voice-directed, barcode-assisted, label, list, cluster, or batch picking. Lets you eliminate lists, labels, and scanners and ensure a safer, more efficient, real-time work environment.

📦 Packing

Use system-directed or assisted packing to support user-configurable container types including cartons, pallets, containers, and others with a variety of attributes including inner and outer dimensions, maximum product weight for a container, and minimum/maximum fill percentage parameters.

🚚 Shipping

Load contents onto a trailer, issue a final release, and coordinate proper ship paperwork such as container pack list, master pack list, bill of lading, master bill of lading, and manifests.

End to End Business solution for your warehouse
