Brilliant WMS Overview :

Brilliant believes that the configuration of any supply chain must consider the client administration and expense. Brilliant Supply chain management software is an excellent solution for managing materials, information, and finances as it moves in the process from suppliers to the warehouse and to the wholesaler and the retailer and finally to the consumer.

Brilliant WMS coordinates and integrates the process flows both within and among companies with ultimate goal to control inventory (with the assumption that products are available when needed).

Analytics & Reporting :

Brilliant WMS reports allows you to better understand the health of your supply chain function with performance, detailed or summarized stock reports. Track bin transactions, order status and bin levels. Brilliant WMS provides you with reports that will help you monitor your inventory. Furthermore:
• Export reports in a desirable format (PDF, Excel, XML, etc.)
• Run detailed queries
• Access reports at anytime using the internet
• Reports are based on advanced technology and can be customized to fit your needs
